

XCAM 2

WIRELESS COLOR VIDEO CAMERA

Watch your front door on your television in your living room or bedroom without running any wires!

Use your VCR as your own video surveillance system.

Watch your children playing in the yard.

Keep an eye on your baby sleeping in the babyroom.

All this and more can be done with the Xcam2. This super small wireless color camera can sent signals through walls and ceilings without running any wires.

With the built-in sensitive microphone sound is also transmitted.

The mini color camera is equipped with a built-in transmitter for both video and sound. The small size allows you to mount the camera out of sight. The camera is splash waterproof and can be mounted outside on any sheltered place.

With the bracket the camera can be angled in almost any position.

The receiver can be connected to any Audio/Video or Scart input of your television or VCR

The X-CAM2 is equipped with the latest 2,4 GHz technology for better quality and trouble free transmission.

Both camera and receiver are powered with the supplied 12 Volt adaptors.
